PROFILE

I am a frontend-focused software engineer with 3+ years of experience building responsive, production-grade web applications for a SaaS learning platform. I work with React, NextJS and TypeScript, collaborate closely across design and backend teams, and actively use AI-assisted tools to ship faster and smarter. I bring strong communication skills, a growth-oriented mindset, and a passion for continuous learning to every team I work with.

SKILLS

Frontend Development: React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Chakra UI, Zod

Performance, Accessibility & SEO: Semantic HTML, accessibility best practices, PageSpeed optimisation, technical SEO

UI/UX Design: UI/UX Design, Figma, Framer

Backend & APIs: Node.js, Express.js, REST API Development, .NET, Nginx, Vercel

Testing: Jest, Cypress

AI & Automation: Cursor, Claude, ChatGPT (AI-assisted development), n8n

Version Control: Git, GitHub

EXPERIENCE

Programiz | Software Engineer

August 2023 - Present

- Built and maintained React and Next.js applications by translating Figma designs into responsive, pixel-perfect, production-ready interfaces

- Migrated the Programiz Pro marketing site to Framer and configured Nginx reverse proxy on the production server
- Built an AI-powered course creation bot using n8n and ChatGPT, integrated via Slack for internal content workflows
- Leveraged AI-assisted development tools (Cursor, Claude, ChatGPT) to accelerate development and improve code quality
- Designed and built the Content Workflow System, defining data flow, access control layers, and backend integration architecture
- Created interactive C, Java and DSA visualizers (linked lists, queues, sorting algorithms, graphs)
- Implemented dark mode across the Programiz PRO app
- Built in-browser JavaScript and HTML playgrounds for live coding inside courses
- Improved test coverage with Jest and implemented end-to-end testing using Cypress
- Built the Programiz Resource Hub with a scalable config-driven design (one reusable page template generates new pages from constants) and led frontend for major marketing campaigns
- Collaborated in Agile teams through sprint planning, code reviews, and performance/accessibility improvements

PROJECTS

- **Melbourne Cheap Rubbish Removal | Freelance Project**

  https://www.melbournecheaprubbishremoval.com.au/

  Built and launched an SEO-focused marketing website for a Melbourne rubbish removal business as the sole developer, and still maintain it.

  - Built with Next.js (SSR) and Tailwind CSS, deployed on Vercel
  - Built an admin panel for content management, with Google login restricted to an allow-list in Google Sheets
  - Added a contact form that emails enquiries via Resend, a WhatsApp chat link, and a Gemini chatbot limited to the client's services and areas

    - Ranks first organically for [keyword], with 55.6K impressions and 265 clicks since the 29 July 2026 launch (Search Console)
    - PageSpeed: 99 / 95 / 100 / 100 on desktop, 89 / 97 / 100 / 100 on mobile (Performance / Accessibility / Best Practices / SEO)
    - Client reported a significant rise in enquiries, including a few large business jobs
- **Expense Tracker | Final Year Project**

  Client: https://github.com/SandarvaShakya/kharcha-saathi-client

  Server: https://github.com/SandarvaShakya/kharcha-saathi-server

  A full-stack web application to track and manage personal and group expenses.

Achievements & Community

- **Hackathon Judge - Hackathon 2.0 (Adhyayan School x Leapfrog) | 2026**

  Served as a pre-screening judge alongside a panel of three, evaluating and shortlisting 7 finalist teams from 54 school participants (grades 7–10).
- **Emotional Intelligence - My Emotion Matters (Sagar Satyal) | 2025**

  Participated in a personal development program focused on understanding, managing, and expressing emotions effectively, improving self-awareness and interpersonal skills.

EDUCATION

2026 - Present **ASCOL | MIT**

Lainchaur, Kathmandu

2019 - 2023 **Sagarmatha College of Science and Technology | B.Sc.CSIT**

Sanepa, Lalitpur
